Education

Birla Institute of Technology 2024 – 2028
B.Tech in Computer Science and Engineering — CGPA: 8.27 *Mesra, Ranchi*

Coursework

Data Structures and Algorithms DBMS Operating Systems Object-Oriented Programming Computer Networks

Projects

Spot2Solve 2026

- Built a full-stack civic issue reporting and resolution platform using React 19, Node.js, Express, TypeScript, PostgreSQL, and Prisma, with separate Citizen, Authority, and Admin workflows and JWT-based RBAC.
- Engineered an end-to-end issue lifecycle with duplicate detection, geolocation, department auto-routing, SLA tracking, escalation, citizen verification, audit history, and role-specific dashboards for transparent issue resolution.
- Integrated Gemini for photo-based issue classification and severity detection, Cloudinary for evidence and voice-note storage, OpenStreetMap for reverse geocoding, and Leaflet for interactive maps, heatmaps, and proximity-based issue discovery.
- Implemented transactional status transitions with append-only audit history, background SLA monitoring with automatic escalation, notification fan-out via in-app alerts and email, and evidence-backed resolution workflows.

Trustly Cars 2026

- Built a full-stack car-rental platform on Next.js 14, Express, PostgreSQL, Redis, and BullMQ with 35+ endpoints, JWT/RBAC, a PWA Service Worker, and IndexedDB-backed offline-first sync that replays queued bookings idempotently via stable `client_ref` keys.
- Engineered a trust & damage accountability system with 5-angle pre/post-trip evidence and a deterministic rule engine, plus an AI assistant pipeline (Context → Rules → Prompt → LLM → Formatter) where the LLM narrates but never decides, with a no-API-key offline fallback.
- Eliminated double-booking under concurrent and offline-replay traffic using Redis locks, transactional `FOR UPDATE`, and `tstzrange` overlap checks; shipped a dynamic pricing engine (demand × time × scarcity) recomputed by a BullMQ cron every 15 minutes.
- Designed safety features (emergency alert with geolocation, shareable trip link, live tracking, KYC) and a polished UI on top of a hardened API (Helmet, Redis rate-limit, Joi validation, Pino logs, S3 presigned uploads).

Finance Dashboard Backend 2026

- Designed a scalable RESTful API backend using Node.js, Express, and MySQL for structured financial data management with JWT-based authentication and role-based access control (admin, analyst, viewer).
- Architected a modular backend using controllers, services, and middleware, ensuring scalability and clean separation of concerns.
- Built transaction APIs supporting CRUD operations, filtering, pagination, and search; optimized database queries using Sequelize ORM to support aggregation queries for dashboard analytics (income, expenses, trends).
- Tested APIs with concurrent requests and integrated validation, centralized error handling, and rate limiting to ensure reliability.

Technical Skills

- **Languages:** Java, JavaScript, TypeScript, SQL
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming, Database Design
- **Backend:** Node.js, Express.js, REST APIs, API Design, Authentication (JWT), RBAC
- **Frontend & Databases:** React, Next.js, HTML5, CSS3, PostgreSQL, MySQL, Prisma
- **Tools & Services:** Git, GitHub, Postman, Docker, Redis, Cloudinary, Leaflet, OpenStreetMap

Coding Profile

- Rated 2 star on CodeChef and 1750+ on LeetCode; solved 500+ DSA problems across various platforms.

Achievements

- Qualified SIH 2026 College Round; worked on **MediKiosk**, a digital clinical intake kiosk that collects patient details, symptoms, and previous lab reports, generates concise clinical summaries for doctors, and uses OCR to extract important medical values.
- Winner of a college-level technical presentation on **AI Applications in Drones**.
- Winner of multiple college-level debate competitions.

Certifications

- IBM Full-Stack JavaScript Developer Professional Certificate – Coursera; Developing Front-End Apps with React – Coursera (IBM); The Complete Git & GitHub Course 2025 – Udemy.

Extracurricular

- Competitive debater and orator with top finishes across inter-school and inter-college events; known for analytical thinking and structured argumentation.
- Writer on Medium, translating complex ideas into clear, engaging narratives.
